Allowable Subject Matter

Claims 4-7 are allowed.

The following is an examiner's statement of reasons for allowance: in addition to reasons for allowance cited previously, the prior art fails to show or fairly suggest an AT-cut crystal with opposing surfaces in which each surface has a primary electrode surrounded by a secondary electrode, each secondary electrode is ground, and additionally input and output measurement terminals each of which are connected to one or the other of a primary and secondary electrode and disposed rightward and leftward of the center of the substrate, respectively. Additionally, an embodiment not fairly suggested or shown by the prior art is the primary and secondary electrode arrangement noted above, but further including disposition of pad electrodes for input and output measurement and associated with the primary and secondary electrodes, further including grounding of the secondary electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

The application has been amended as follows: Cancel claims 1-3.

These claims were the non-elected claims in the response to the election/restriction requirement of 2/2/05.
